

FINISH FIRST NC FEATURES

NEAR COMPLETIONS

Finish First NC finds students who are within striking distance (one semester) of completing a degree, diploma or certificate, and tells you the exact courses they need to take to finish it.

NEW COMPLETIONS

Finish First NC identifies students who have met requirements for a degree, diploma, or certificate, but are unaware of it or have not applied for graduation.

GPA CALCULATION

FFNC calculates the grade point average of the program within closest proximity to completion, so students and advisors can make informed decisions about the next steps. Credentials that can be obtained with a GPA of 2.0 or higher are displayed.

INSTITUTIONAL CREDIT VERIFICATION

FFNC displays credentials earned with 25% or more of institutional credit hours (the SACSCOC requirement) so you only see students who are eligible to receive a credential from your institution.

GRADUATION CHECK

Finish First NC verifies student records to ensure that students have not already obtained the credential(s) displayed in the outputs.

COURSE SUBSTITUTIONS

FFNC shows you the courses students have taken that have not been applied to any credentials, so your institution can decide if they can be applied to the evaluated credential.
