## Priority Admissions Process

To select applicants for Medical Assisting, Wake Tech uses a priority admission procedure – NOT a waiting list. The admission procedure for Medical Assisting is a two-part process utilizing both a first-come, first-served process and class completion. This procedure is used if there are more applicants who have met the minimum admission requirements (MAR) than there are available clinical spaces. Those applicants with the most general classes completed (see list below) with a “C” or better and with the earliest program application submission date will be selected for the available clinical slots.
