## Wi-Fi and Data Connections

**Problem:** The student is having trouble connecting to class on their phone or laptop.

- **Are you connecting to a data plan or a Wi-Fi connection?**
  - It is best practice to use Wi-Fi connections instead of cellular data, if available
  - On an iPhone, go to Settings → Cellular → Cellular Data, it will show what applications are consuming data.
  - Switch your choice of apps (such as Zoom, Microsoft Teams, etc.) to off so that they will only work when connected to Wi-Fi.
  - If the student does not have Wi-Fi, then disregard this solution.
- **Is the Wi-Fi turned on the phone and/or laptop?**
  - **iPhone or iPad**
    - Settings → Wi-Fi → Press Circle. If Wi-Fi is on, it will turn green and automatically search for available Wi-Fi networks.
    - Tap the name of the Wi-Fi network you want to join.
    - Enter the network's password.
    - After joining network, it will have a blue checkmark next to the network name, and a connected Wi-Fi icon in the upper corner 📶
  - **Android**
    - Swipe down from top of screen
    - Touch and hold Wi-Fi 📶
    - Turn on Use Wi-Fi
    - Tap a network, enter password if needed
- **Is the Wi-Fi connection slow or weak?**
  - This google search will test your Wi-Fi's speed and help you figure out where in your house the Wi-Fi is strongest.
    - [Open Google on your web browser](#)
    - Search **Internet speed test**
    - Click **RUN SPEED TEST**
  - Try moving closer to your internet router. The closer you are to your router, the better your Wi-Fi connection tends to be.
- **Do you need to restart your router?**
  - If the signal cuts out, try restarting your Internet router. This can be completed by either unplugging and plugging the router back in, or pressing the power button.

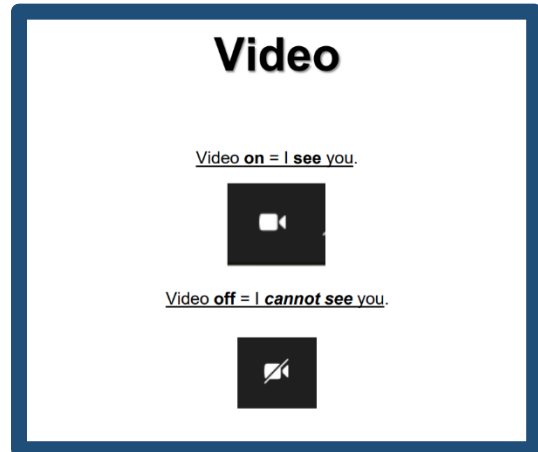

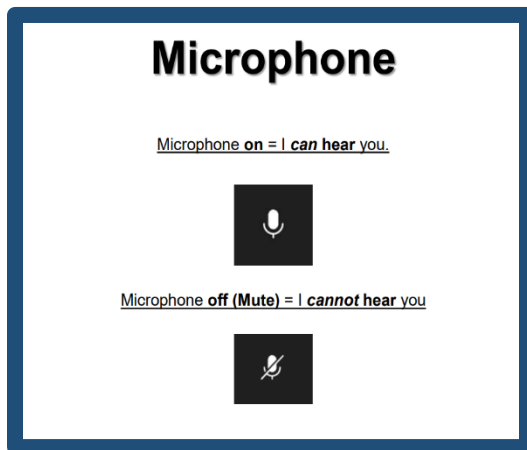

## Other Wi-Fi and Internet Service Solutions

- If you do not have internet in the home, you can contact your cable provider to see if they have internet packages and Wi-Fi programs. They often have special programs and discounts for students or low-income.
- [Turn your phone into a mobile Wi-Fi hotspot](#), if your cellular carrier allows.
- You can purchase a mobile Wi-Fi hotspot from your cellular carrier.
- [Map of free Wi-Fi Hot Spots in the Raleigh area](#)

## Turning on Audio/Visuals

**Problem:** The student's camera and/or audio are not working.

- Your audio and/or camera turned on? (This means there should **NOT** be a slash through either icon.)

- If audio/video is allowed and turned on in settings, but is still not working:
  - On a computer, go to your computer settings, go to troubleshoot, scroll to microphone and/or screen visual
  - Open the designated setting and click the troubleshoot button. This should either fix the problem or tell you what the problem is.
- If the student's microphone/headphones are plugged in, but it's still not working, you may need to check the audio's source:
  - Zoom → the ^ button beside Mute/Unmute → Select a Microphone
    - Change the default microphone to whichever the student is using
      - System → Built-in laptop microphone
      - External → Plugged-in headphones
  - Teams → Click "More actions" (⋮) then click Device Settings → Select your audio device.

## Logging into Class Meeting

**Problem:** The student is unable to log into their class for various reasons.

### Class Access Links

- Teachers send class access links to the student's email before the first day of class. Have you clicked the link?
- Is it hidden in a hyperlink (a blue and underline word/series of words in a document)?
- Is your class on **Zoom** or on **Teams**? Is this app up to date?
- If you still cannot find the link, contact your teacher to resend.

### Zoom

- If your class uses Zoom, you need to download the app on your phone or computer.
- To attend classes, you DO NOT need to set up a Zoom account, just click the link your teacher has provided.
- Does your class require a meeting code or password?
  - Check with your teacher if a passcode or meeting code is required. If it is, enter this code when prompted.
  - If you are sent to a "waiting room" your teacher will let you into class.
- [Zoom Download Center](#)

### Teams

- To join a Teams class, open your Teams app and go to the "Calendar" section

- To access your Teams class, you must:
  - Have an active [Wake Tech email address](#)
  - Download the **Teams app** on your computer or smartphone
  - Please see our [Microsoft Checklist](#) for information about Wake Tech email address and Teams app downloads.

## Google Chrome Web Browser

**Google Chrome** is the recommended web browser for Wake Tech CCR students.

### Google Chrome Installation

- [Download & install Google Chrome](#)

### Device Language Settings

- Go to your device settings.
- Type “Language” into the search bar.
- Change the default language to the language of your choice.

### Language Translation

- Many websites and forms (such as Google Chrome) can be translated automatically by right clicking on the page and selecting the translate option in the pop-up menu.
- [How to Translate Websites using Chrome](#) (video, 5 minutes)
- On Google Chrome, you can install the [Google Translate Chrome Extension](#) from the Chrome web store. This will allow you to search, highlight, and translate via Google Translate more easily. However, it will not translate all forms and websites.
- [Google Translate Help](#)

## Wake Tech Email Addresses

ESL, ABE, and ASE have a Wake Tech email address if they are an active student.
