

INTERIOR DESIGN

des.waketech.edu

Associate in Applied Science Degree

This program prepares students for various residential and commercial interior design job opportunities. It includes space planning, codes, the history of interiors and furnishings, color theory, products, business practices, graphic presentations, and general education courses.

Students will learn the software programs used by interior designers, architects, and remodeling professionals, which will develop the technical skills employers are looking for. The programs include AutoCAD, Chief Architect, Revit, SketchUp, and Photoshop.

ENGINEERING, TECHNOLOGIES AND SKILLED TRADES DIVISION
